SEARCH...

FOR ALL OCCASIONS

Whether you're looking to make a purchase or find the perfect buyer, our marketplace connects you with opportunities across diverse categories, making transactions simple and efficient.

Wide Variety of Items

Access to diverse categories, including vehicles, machinery, and properties.

Auction Flexibility

Both individual and commercial sellers can list items, enhancing market reach.

Specialized Listings

Focus on high-value assets like mining equipment and industrial facilities.

User-friendly interface

Streamlined bidding and purchasing experience for buyers.

Industry support

Caters to various sectors, making it suitable for different business needs.

Transparency

Clear auction processes, ensuring trust for both buyers and sellers.

The Auction Market Place also offers a wide range of car parts, GPS systems, and in-car technology. This includes essential automotive components, navigation systems, and cutting-edge tech solutions for vehicles. These additions make the platform appealing to automotive enthusiasts and professionals alike, providing everything from basic parts to advanced in-car gadgets.

**BUY.
SELL.
THRIVE.**

TRANSPORTATION AND LOGISTICS

TRANSFORMING AUCTION LOGISTICS: A SMARTER, FASTER APPROACH

In the high-stakes world of auctions, efficient logistics can make or break the experience. That's why we've created a solution designed to streamline every step of the process. Here's how we're setting a new standard for auction logistics:

Real-Time Tracking with **TRUApp**

Transparency builds trust, and our upcoming TRUApp delivers just that. With real-time tracking, you'll have up-to-the-minute updates on pick-ups and deliveries, giving you and your clients unmatched peace of mind.

Effortless Pick-Up and Delivery Management

Simplify your workflow with our intuitive system for issuing pick-up and delivery notices, tickets, and orders. Say goodbye to manual tasks and hello to a streamlined, precise process that keeps everything running smoothly.

Automated Distance-Based Fee Calculation

Forget manual calculations. Our system uses Google Maps integration to automatically calculate pick-up and delivery fees based on precise distances between auction sites and client locations. This ensures accurate pricing while saving you time and reducing errors.

Customizable Fee Structures

One size doesn't fit all when it comes to your clients. Our platform lets you tailor fees to meet each client's unique needs, creating a more personalized and professional experience that strengthens relationships and builds loyalty.

Tailored Solutions for Unique Needs

Every business is different, and we understand that. Our platform is designed to adapt to your specific requirements, offering bespoke solutions that align perfectly with your logistics and transportation goals. Experience unparalleled flexibility that empowers you to operate your way.

AI AUCTIONEER

TIRELESS AUCTIONEER'S ALTERNATIVE

The auctioneer is often likened to an orchestra conductor, setting the pace and uniting all performers. Now, imagine keeping the showmanship without the high costs of an auctioneer and ringman. Auction Streaming introduces the A.I. Auctioneer (Beta), blending human charisma with machine learning for a groundbreaking experience.

This A.I. acts like a human auctioneer - engaging, selling, and entertaining - but never tires, takes breaks, or loses focus. It calls to buyers in-lane and online, tracks their habits, and adjusts dynamically to boost sales. High-demand vehicles get extended bids, while low-interest items are swiftly closed or rescheduled. A.I. Auctioneer delivers seamless performance and significant savings.

THE BENEFITS FOR AUCTIONS

Fast

Large language modeling (LLM) and adaptive speech algorithm.

Cost-Saving

Day 1 ROI savings of auctioneer and ringman cost.

Predictive

Adaptive and complex AI auctioneer speech.

Integrity

No more phantom bids, fake or missed bids, no shenanigans.

Machine Learning

Continuously adapts to buyer input.

Timed

Time-conscious and monitoring with alert announcements.

Multilingual

Customized, user-specific, language delivery system.

Tireless

Never tires, gets sick or complains.

Non-gender

Select the gender voice of your choice.

MARKETPLACE

REACH BEYOND THE GATES

Sell cars everyday, not just on Sale Day. The Local Marketplace platform offers auctions the opportunity to market and sell online any day of the week directly from physical inventory of the auction or from virtual inventory on your dealer's lot.

The Local Marketplace is integrated with our AuctionLink™ service, connecting your auction directly with the Dealership Management System (DMS) for seamless uploads of vehicle information and photos.
